## SUMMARY

---

AI/ML enthusiast with hands-on experience in NLP, Generative AI, and large-scale data processing. Experienced in building custom deep learning pipelines using PyTorch and HuggingFace, including RAG systems, BERT-based models, and vector database retrieval. Skilled in optimizing inference workloads on modern GPU architectures including NVIDIA RTX 50-series (SM120).

## EXPERIENCE

---

### Data Analyst

2026 - Present

[typescript\\_elections](#) ↗

- Parsed and processed **152,000+ voter records** from the Kavre district voter dataset using **NumPy** and **Pandas** for efficient large-scale data handling.
- Implemented **EasyOCR** with a custom image segmentation pipeline to accurately extract **Devanagari text and numerical data** from voter list PDFs.
- Designed an automated **PDF → image → segmented text extraction pipeline** to improve OCR accuracy on structured voter documents.
- Successfully processed and structured the entire dataset **within one week**, delivering a reliable voter data searching system.

### Full Stack developer

[Khojauhub](#)

- Completed a **two-semester full-stack project** developing both frontend and backend using **Django**.
- Integrated **BERT (Bidirectional Encoder Representations from Transformers)** for natural language understanding.
- Implemented a **chatbot system** with **Retrieval-Augmented Generation (RAG)** for context-aware responses.
- Used for retrieving business data like phone numbers, menu, listed items, pricing of same product on different places.
- Built a **search functionality** using **k-nearest neighbors algorithm** to retrieve relevant products based on **product titles or user descriptions**.
- Developed and integrated the complete system including **UI, API endpoints, model integration, and search pipeline**.

### Backend developer

[Sadak Sathi \(Semester project\)](#) ↗

- Developed **Sadak Sathi**, a system to **track buses live across multiple routes inside and outside Kathmandu Valley**.
- Built a **bus arrival time prediction model** using **XGBoost** trained on **time-series data from Mahanagar Bus services**.
- Parsed and processed **1,000,000+ data records** using **NumPy** and **Pandas** for large-scale data handling.
- Performed exploratory analysis and visualization using **SciPy**, **Matplotlib**, and **Seaborn**.
- Achieved **~2.4 minutes RMSE** for predicted bus arrival times.

## EDUCATION

---

### Computer Science

2022 - Present

Kathmandu University - School of Science - Bachelors in Science (Computer Science)

**Computer Science** ↗  
Khwopa Secondary School - +2 / SLC

03/2021 - 2022

Golden Future Academy - SEE

03/2007 - 03/2020

## CERTIFICATES

---

**Datacamp** ↗  
Kathmandu University Artificial Intelligence Club(KUAIC)

2025 - 2025

## SKILLS

---

Problem identification and solving mindset

Video editor

Huggingface / git / model inference

2 wheeler driving

English Speaking

Coding

Trading

## LANGUAGES

---

English

Nepali
